## FOR IMMEDIATE RELEASE

### **Ares Armor Announces the Online Availability of 5.45 Barrel & Bolt Combo Pack.**

**Oceanside, CA – Build Your Own Firearm** – Ares Armor announces the online availability of NEW 5.45 x 39 AR15 Nitride 16” Barrel in combination with 5.45 AR15 Bolt Assembly. By supplying everyday consumers and tactical enthusiast’s with affordable, quality products; Ares Armor is supporting our 2<sup>nd</sup> Amendment Rights.

---

#### **Package Purchase Includes:**

- 5.45x39 AR15 Nitride 16” Barrel
  - 5.45 AR15 Complete Bolt Assembly
- 

#### **BARREL:**

The featured barrel which is 16 inches in length is made from 4142 Steel, has a 1:8 twist, is Black Nitride coated and has a Carbine length gas system. Made in the USA. All NFA Rules Apply.

#### **What is BLACK NITRIDE?**

The Ares Armor pistol buffer tube begins its life as a piece of 1.375 Diameter billet 6061 aluminum. It is then transformed into a piece of patriotic wonder by being turned down to a 1.355 diameter pistol buffer tube with three lines machined into the exterior to signify the III%. The tube is rounded at the end and sent off to be anodized with a mil-spec hardened anodized finish. In the end we have produced a 100% American made product which is superior to all that is available.

---

#### **BOLT:**

Compatible with mil-spec carriers and machined from C-158 to exceed all MIL TDP specifications. This bolt assembly provides a superior durability, lubricity and corrosive resistance than others on the market.

---

#### **New Product Availability**
