

FOR IMMEDIATE RELEASE

Ares Armor Announces the Online Availability of 16" Barrel 7.62 x 39.

Oceanside, CA – Build Your Own Firearm – Ares Armor announces the online availability of NEW 7.62 x 39 AR15 Nitride 16" Barrel. By supplying everyday consumers and tactical enthusiast's with affordable, quality products; Ares Armor is supporting our 2nd Amendment Rights.

Purchase Includes:

- 7.62x39 AR15 Nitride 16" Barrel
-

Barrel Features:

The featured barrel which is 16 inches in length is made from 4142 Steel, has a 1:10 twist, is Black Nitride coated and has a Carbine length gas system. Made in the USA. All NFA Rules Apply.

What is the Black Nitride Process?

This finishing process is a surface conversion process in place of industrial hard chrome and is therefore inherently free from nodules, flaking, pits, stripping, or anode burrs. The process results in chemical and structural composition changes that can be described as a case hardening to a depth of 0.005" of the alloy leading to increased surface hardness, lower coefficient of friction, enhanced surface lubricity, improved running wear performance, increased sliding wear resistance, enhanced corrosion resistance and heat resistance over industrial hard chrome. The process is a surface conversion and does not add material to the internal dimension of the bore. With hard chrome, the bore must be manufactured oversized or honed and electro-polished to make the interior dimension oversized making room for the chrome plating. This plating is inconsistent which is the reason sniper or target barrels are typically not chromed. It has proven superior as a surface finish to phosphate with oxidization when subjected to MIL-STD-810f salt fog/spray testing and is a scratch resistant flat black finish.

New Product Availability

Ares Armor Build-an-AR15 products are driven by customer feedback and built to last. The 16" Barrel

7.62 x 39 is available for immediate purchase at:

http://aresarmor.com/store/Item/762x39_Barrel_16inch.

Founded in 2010, Ares Armor (home of the 80 percent lower) supplies consumers with tactical gear, 80% lower ar-15 or ar-10 receivers; and build-your-own firearm products.
