## Kydex Universal AR-15 Mag Pouch Features and Benefits.

Throughout history it has been shown that an enemy will always adapt to armor; it is much more difficult for him to adapt to speed and maneuverability. Efficiency in manipulation of your weapon system allows critical decision making time; therefore increasing survivability.

The Universal AR-15 Mag Pouch will hold any 556/223 magazine that fits in an AR-15 Mag Well.

Ares Armor Full Spectrum (FS) Universal AR-15 Single Magazine Pouch is constructed from a .080 Kydex brand thermoplastic. The use of .080 material thickness has shown to be incredibly durable and more than capable of handling the requirements of the universal AR-15 mag pouch user.

### Mounting Options:

- Mount Belt Loops
- Tech Lock or Blade Lock
- Right or Left Hand Dominant

Custom Kydex FS products are considerably smaller than any other mag pouch on the market. This attribute provides an advantage in terms of comfort.

Unlike the typical book pressed Kydex, Ares Armor brand Kydex is vacuum formed. This method provides superior definition in comparison to conventional methods producing a distinct retention characteristic that most shooters prefer to other styles of mag pouch forming.

Custom Kydex FS line is considerably smaller than any other holster on the market. This attribute provides a considerable advantage in terms of concealment as well as comfort.

\* Ares Armor Universal AR-15 Kydex Mag Pouch is available in a standard Black. Additional options are available at an additional cost which include: OD Green, Coyote (shown), Red, Tan, Grey, Brown, A-TACs AU/FG and Digital Pink.
